

FULL LEGAL & OPERATIONAL SUPPORT

Set Up a Mining Company in Peru

From Concession to Residency — Company registration, mining concessions, environmental and export permits, investor visa and carné de extranjería, all under one contractor.

THE MARKET

Why Peru for Mining Investment

Peru is one of the world's top mining destinations, rich in gold, silver, copper, and other minerals. The country offers vast untapped geological potential, particularly in southern regions like Arequipa, where mineral deposits remain abundant and accessible.

For foreign investors, Peru represents a unique opportunity to enter a resource-rich market with established mining traditions. However, navigating the regulatory landscape requires local expertise and coordinated management across multiple government agencies.

That's where we come in — your single point of contact for the entire journey.

THE CHALLENGE

Why Foreign Investors Struggle Alone

Peruvian law requires legal presence, local representation, and procedures across multiple agencies. Without knowing the system, every step turns into lost months or costly mistakes.

Legal Entry Barrier

01

Without residency, you cannot officially be the director of your own company from day one. A temporary legal representative is required during the transition period.

Fragmented Agencies

02

SUNARP, INGEMMET, SUNAT, OSINERGMIN, ANA, and Migraciones operate independently. Coordinating them manually takes months of specialized effort.

Regulatory Risks

03

A concession without due diligence, exports without licenses, or working with mercury without an IQBF permit leads to fines and project shutdown.

OUR SOLUTION

One Contractor, Complete Coverage

We don't just consult — we work in the industry. From the first concession check to the day you hold your residency card, every stage is managed under one contract with clearly defined deliverables and timelines.

14⁺

Services in One Package

Company Registration

S.A.C., S.A., or S.R.L. incorporation with SUNARP and SUNAT

Concession & Permits

INGEMMET filings, environmental DIA/EIA, water and fuel permits

Residency visa & carné

Export permits & sales channels

Listed amounts are starting prices for support services. Government fees are paid separately at official rates.

Not Just Paperwork — Real Market Access

We help not only legalize mining operations but also organize product sales. Our clients get access to verified wholesale buyers and processors — not middlemen at every step.

Gold, Silver & Mineral Export

Full support for export operations including customs procedures, documentation, and compliance requirements for precious and base metals.

1

Metal & Mineral Export

Export operations and customs procedures for gold, silver, and other metals

2

Direct Buyer Contacts

Access to verified buyers and processors without intermediaries

3

Export Compliance

RECPO, SBS Oficial de Cumplimiento, and all legal export requirements

WHY US

Experience in the Industry, Not Just in Paperwork

Industry Expertise

Direct experience working with concessions and formalizing mining operations in southern Peru, not just theoretical knowledge of laws.

One Contractor for All Agencies

We coordinate SUNARP, INGEMMET, SUNAT, OSINERGMIN, ANA, SBS, and Migraciones so you don't have to navigate them alone.

Clear Transfer of Control

All stages and timelines for company transfer are fixed in the contract from the very beginning. No surprises.

“We don't just consult — we work in the industry. Every client gets a clear roadmap from day one to full ownership.”
